

Additives for PVC Processing

– Extrusion –

CREATING VALUE for tomorrow, through all that we do today

From basics to semi-specialty and specialty chemicals, Emery Oleochemicals is dedicated to providing customers with best-in-class solutions through continuous product development and stringent quality standards. Derived from renewable resources, our products are predominantly made from natural oils and fats such as palm kernel oil and tallow. We pride ourselves on having a diverse portfolio of oleochemical products suited for a broad range of applications.

Our portfolio includes renewable solutions for the Agro Green, Bio-Lubricants, Green Polymer Additives, Home and Personal Wellness and OleoBasics markets.

Leading product innovation naturally

We are committed to CREATING VALUE for you with our combined strengths in global manufacturing footprint, research and development, distribution, marketing and technical know-how. Uniquely packaged, our competitive advantage enables us to offer you innovative and competitive solutions designed to meet your needs.

Guided by an inventive spirit that goes beyond providing high-performance solutions, we are able to help your business deal with the challenges of a market that is going greener by the day. This makes us your preferred natural-based chemical solutions partner.

Designing natural-based solutions in polymers for a better tomorrow

For over 60 years, we have been recognized as a leading innovator of a broad range of polymer additives with our high-performance natural-based chemical brands, LOXIOL® and EDENOL®. For having successfully improved our customers' product performance and processing efficiencies, our solutions today can be found in growth markets such as housing and construction, automotive, packaging and electronics. Our products are also known to enhance the quality of items for everyday life including toys and sporting equipment.

As your preferred partner with leading technical expertise, we offer customized solutions based on product groups such as lubricants, plasticizer and viscosity depressants, anti-static and anti-fogging agents, release agents, surfactants, green polyols and specialty fatty acids.

We remain committed to delivering the highest in quality standards and innovative solutions while building a sustainable tomorrow in polymers.

GUIDE FORMULATIONS

Formulation: CaZn stabilized	Processing of Dryblend on Twin-Screw	Processing of Dryblend on Single-Screw
	Dosage (phr)	
S-PVC, k-value 60-68	100	100
Coated CaCO ₃	5.0-15.0	5.0-15.0
Impact Modifier	0-5.0	0-5.0
Flow Modifier	0-1.5	0-1.5
CaZn-Stabilizer	3.0	3.0
LOXIOL® G 32 / G 34 R	0.8	1.0
LOXIOL® G 21 H	0.2	0.2
LOXIOL® G 20 / 2050	0-0.15	0.2
TiO ₂	X	X
Color correction	X	X

Formulation: Pb stabilized (outdoor)	Processing of Dryblend on Twin-Screw
	Dosage (phr)
S-PVC, k-value 65-68	100
Coated CaCO ₃	5.0-15.0
Impact Modifier	0-5.0
Flow Modifier	0-1.5
LOXIOL® GH 4	1.0-1.5
LOXIOL® G 72	0.5-0.8
Tin stabilizer	1.5
LOXIOL® EP 3500	0.2
LOXIOL® G 20 / 2050	0-0.2
Color correction	X

Formulation: Sn stabilized (crystal-clear)	Processing of Dryblend on Twin-Screw
	Dosage (phr)
S-PVC, k-value 60-68	100
Impact Modifier	X
Flow Modifier	0-1.5
LOXIOL® GH 4	1.0-1.5
LOXIOL® G 72	0.5-0.8
Tin stabilizer	1.5
LOXIOL® EP 3500	0.2
LOXIOL® G 20 / 2050	0-0.2
Color correction	X

Remarks
For formulations based on granules it is useful to increase the dosage of LOXIOL® G 72.

Remarks
For formulations based on granules and also with thin-walled profiles it is useful to increase the dosage of LOXIOL® G 32 / G 34 R R and also Loxiol® G 60. Using High Impact Modifier like EVA, CPE or Acrylate an increase of external lubrication can be necessary.

■ NOTES

■ NOTES

EDENOL® & LOXIOL®

LOXIOL® and EDENOL® are the plastics additives brand names of Emery Oleochemicals. Our products are based on natural resources for the processing of plastics materials. The main product groups and functions we offer are:

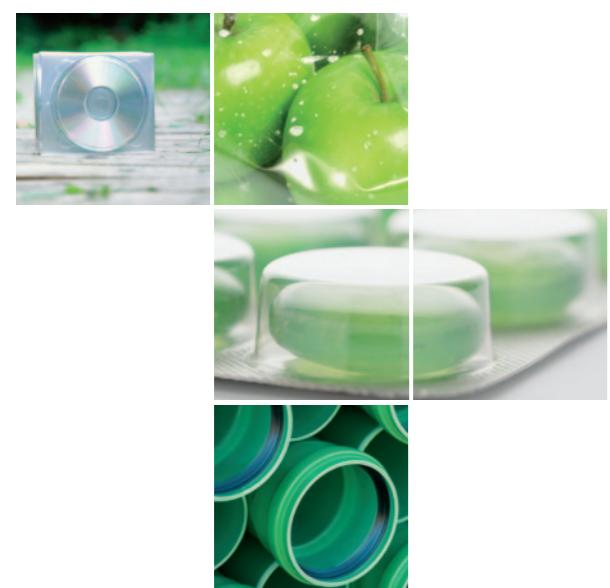

Lubricants – Optimise the processing characteristics of plastics materials. Our lubricants improve the rheology of the polymer melt by reducing friction and resistance to flow within the melt. [>>>](#)

Positive influence on the mechanical properties, machinery output and surface finish of the final product.

Release Agents – Aid in the separation of a component from its mould. [>>>](#) Positive effect on cycle time and surface finish.

Special Plasticizers – Improve processability and performance of plastics and synthetic rubbers. [>>>](#) Positive influence on flexibility and durability of the final article.

Viscosity Regulators – Improve the flow of PVC paste formulations. [>>>](#) Positive influence on processing temperature and processability.

Antistatic Agents – Eliminate the build-up of a static charge in the finished article. [>>>](#) Positive effects including avoidance of dust pick-up, handling problems as well as the risks associated with static discharges.

Antifogging Agents – Prevent the formation of water droplets on plastics film surfaces. [>>>](#) Positive effect on visibility, quality and attractiveness of packed products and avoidance of damage to plants in growing tunnels.

Antiblocking/Slip Agents – Reduce the friction between the polymer to polymer surface or processing equipment. [>>>](#) Positive effect on production handling by preventing adhesion.

CREATING VALUE FOR OUR CUSTOMERS,
ANYWHERE IN THE WORLD.
